Projects

USC Days 2024 Scoreboard (*Project Manager & Full-Stack Developer*)

- Led a **team of developers** to build a **score tracking system** for USC's annual intramurals.
- Managed **project planning, task delegation, and stakeholder requirements** to ensure timely delivery.
- Developed **user authentication, score updates, game scheduling, a champions page, and admin management**.
- Built using **Next.js, Supabase, Prisma ORM, Tailwind CSS, Zustand, ShadCN, and Zod** for scalability and efficiency.
- Successfully **deployed and used by the entire university**, now an **annual tool for USC Days**. Managed project requirements by coordinating with stakeholders, ensuring timely and efficient delivery of features.

Digital Archives – Today's Carolinian (Project Manager & Full-Stack Developer)

- Led a **team of developers** to build a **digital archives** for the university's historical publication content
- Developed a **digital archive web application** for the Today's Carolinian, the official student publication of the University of San Carlos
- Built with **Next.js, Supabase, Prisma ORM, and Tailwind CSS** to ensure performance, scalability, and responsive design
- Implemented **user authentication and admin-restricted content management** for secure and controlled access to publication archives
- Designed an intuitive UI enabling users to **search and browse past articles with ease**
- Successfully launched and adopted university-wide, becoming a key platform for **preserving and accessing historical publication content**

The Roman Catholic Archdiocese of Cebu - Official Website (*Lead Developer & Project Manager - Volunteer Work*)

- Developed the official website for The Roman Catholic Archdiocese of Cebu from scratch under the approval and guidance of CADComM, the archdiocese's official digital team.
- Designed to serve as the central digital hub for the Catholic faithful in Cebu, clergy, and visitors seeking information about the archdiocese.

- Implemented using **WordPress** to create a comprehensive and user-friendly platform
- Integrated key features including **announcements section, Circulars and Memoranda repository, news features, multimedia galleries (photos/videos)**, and complete directories of **clergy and bishops, parishes and shrines, and institutions**
- Successfully **deployed and actively maintained**, facilitating communication and engagement within one of the Philippines' most significant Catholic archdioceses

KidneyPal PH (*Web Developer*)

- Client project developed for a Bachelor of Science in Nursing academic research study on the quality of life of patients with Chronic Kidney Disease (CKD) undergoing hemodialysis.
- Designed to showcase research findings exploring physical, psychological, social, and environmental well-being dimensions of CKD patients
- Built using **WordPress** to create an accessible platform for patients, healthcare providers, researchers, and the general public
- Integrated **downloadable research papers, dedicated resource sections for patients and healthcare providers, interactive contact forms, and community forums for guests.**
- Successfully **deployed and live**, providing valuable insights and resources for understanding and improving the lives of those affected by chronic kidney disease
