SKILLS SHOWCASE CHALLENGE

IT & OPERATIONS (IT & PROGRAMMING)

Web Development Intern Challenge

Challenge:

Estimated Time: ~3 days

Tech Stack: Your choice (Vanilla JS, React, PHP, Node, Laravel, etc.)

Submission: GitHub repo (Must be Public)

Goal: Build and submit a fully functional and visually clean Personal Portfolio Website that

showcases your web development skills — from layout to basic interactivity and deployment.

Overview:

You're tasked with creating a personal portfolio website with at least 3 sections/pages:

Required Sections

1. Home

- Your name, profile picture, and a short bio
- Optionally a banner or intro animation

2. Projects

- List of at least 2 projects you've built (real or mock)
- For each: title, description, tech used, and image or link

3. Contact

- A simple contact form (name, email, message)
- It does not need to send email — just show a success alert on submit

Requirements:

1. Must Have:

- Built using HTML + CSS + JavaScript or any stack you're comfortable with (React, Vue, Laravel, etc.)
- Must be responsive (works well on mobile and desktop)
- Clean, organized layout (use Flexbox/Grid or a CSS framework)
- Smooth navigation between sections or pages

2. Bonus (Optional):

- Dark mode toggle (bonus if it saves preference)
- Fetch your GitHub repos dynamically from GitHub API
- Use animations (e.g., scroll fade-ins, hover effects)
- Deploy it online (e.g., GitHub Pages, or Vercel)

Challenge Submission.

1. Submit the following in a GitHub repository and as a ZIP file on Google Drive:

- All source code (HTML/CSS/JS or framework files)
- README.md with:
 - ◆ Short description
 - ◆ Technologies used
 - ◆ Any setup instructions (If deployed) Link to live website
 - ◆ Optional screenshots
- Portfolio (Optional)

2. Copy the Google Drive Link and input it in the Submission Form below:
